DETAILED ACTION

1. This action is in response to the Amendment filed on December 26, 2007. Claims 1-31 are pending and have been considered below.

Response to Arguments

Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A

Art Unit: 2611

COMPACT DISC.

(f) BACKGROUND OF THE INVENTION.

(1) Field of the Invention.

(2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.

(g) BRIEF SUMMARY OF THE INVENTION.

(h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).

(i) DETAILED DESCRIPTION OF THE INVENTION.

(j) CLAIM OR CLAIMS (commencing on a separate sheet).

(k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).

(l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

5. The applicant is advised to provide the headings in the specification as required.

On page 1 "BACKGROUND OF INVENTION" should be inserted at the top, similarly on

page 6 "SUMMARY" should be inserted between line 22 and line 24, also on page 13

"BRIEF DESCRIPTION OF THE DRAWINGS" needs to be inserted between lines 23

and 25, and on page 16 "DETAILED DESCRIPTION" should be inserted between lines

7 and 9. Appropriate correction is required.

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422

Art Unit: 2611

F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1 and 31 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 and 36 of U.S. Patent No. 7,292,662. Although the conflicting claims are not identical, they are not patentably distinct from each other because all the limitations in Claim 1 of instant application are similar to claim 1 of the US patent 7,292,662 except: "a phase interpolation unit which rotates the generated reference phase...in response to a rotation control signal" which is principally similar to the limitation of the patent 7,292,662 i.e. "a binary rotator which rotates...in response to the fine track control signal". Therefore, both the limitations are doing the same thing for rotating the phase according to a control signal. Claims 31 of present application is similar to claim 36 of the patent mentioned above and is therefore an obvious variant thereof.

8. The instant application claim 1 is broader in every aspect than the above mentioned patent claim 1 and is therefore an obvious variant thereof.

9. Although the conflicting claims are not identical, they are not patentable distinct from each other because claim 1 is generic to all that is recited in claim 1 of the US patent 7,292,662. That is, claim 1 is anticipated by claim 1 of the US patent 7,292,662.
